

OPENING A **PAYPAL ACCOUNT** THAT SENDS AND RECEIVE PAYMENTS IN UNSUPPORTED COUNTRIES LIKE **NIGERIA** FREELY **WITHOUT VPN** [IN 5MINS]

WARNING: If you want to continue your Internet business **WITHOUT** a PayPal Account to receive your payments from Abroad, then don't read this Guide

***You Really Don't
Want to! Right?***

Sure Thing!

This is Prosper Noah here, the Founder of TipsonBlogging.com, and SEO Enthusiast who's been in the game for More than 2 Years.

And Yes, an Internet Marketer Just Like You!

Congrats on the purchase of this eBook because right now you are going to learn how to create a PayPal Account that will definitely send and Receive Payments in Nigeria and other countries without the Ability to Receive.

Short PayPal Story

“

When I started on the Internet, I and we all started from taking surveys.

Being urged to take some surveys online and get Paid straight Into our PayPal account, after wasting a whole lot of time on those surveys, being a Nigerian I wasn't able to receive the Payments.

And Most of the sites were SCAM anyway....

But the issue of not being able to receive payments to paypal as a Nigerian wasn't so cool for Internet Marketers. There has to be a way...

There has to be an alternative

So after few years on the internet, I fully became focused on Internet Marketing Advanced.

- Not Survey Taking
- Not Paid to Click Sites
- Not Paid per Views of Advertisement etc..

I ventured Into advanced and full Internet Marketer and Blogger.

But things became Worse.

I need to receive my Payments from Affiliate Marketing Programs, CPA Offers, Payments from Abroad for Sponsored Adverts or Posts.

Lots More.

I needed it badly and so,

There was Goodnews!

I finally created a PayPal Account that can help me receive my Payments from any where in the World.

I didn't Keep it to my Self. I want to show you how you can do the same thing right in this Guide, you're so Lucky to have gotten this eBook.

Any Proof?

Yes, below are my recent transactions as at the time of Writing this Guide.

The screenshot shows the PayPal account interface. At the top, there are navigation links for Payments, Activity, Tools, and More. On the right, there are icons for notifications and settings, and a Log out button. The main content area is divided into two columns. The left column displays the available balance as 0.21 USD, with links for Withdraw funds and Currencies. Below this is an Invoicing section with a 'More >' link and a 'Create invoice' button. The right column shows a table of recent transactions under the heading 'Ready to ship Payments received Payments sent Activity (including balance & fees)'. The table lists five transactions with their dates, descriptions, and amounts.

	Ready to ship	Payments received	Payments sent
Activity (including balance & fees)			
8 Nov 2017		Payment to Lakunle Popoola Completed	-10.00 USD
8 Nov 2017		Payment from Ivan Jurišić Completed	10.00 USD
7 Nov 2017		Payment to Lakunle Popoola Completed	-19.00 USD
7 Nov 2017		Cancelled Payment from funkpmedia@gmail.com Completed	19.00 USD
7 Nov 2017		Payment to funkpmedia@gmail.com Canceled	-19.00 USD

Below are the Payments I received earlier November too in my activities.

The screenshot shows the PayPal 'Activity' page. At the top, there is a navigation bar with the PayPal logo, 'Payments', 'Activity', 'Tools', and 'More'. On the right, there are icons for notifications and settings, and a 'Log out' button. The main content is a list of transactions with columns for a checkbox, date, transaction type, sender/receiver name, status, and amount.

Checkbox	Date	Transaction Type	Sender/Receiver	Status	Amount
<input type="checkbox"/>	6 Nov 2017	Payment from	Ivan Jurišić	Completed	20.00 USD
<input type="checkbox"/>	5 Nov 2017	Payment to	Ionicware Inc	Completed	-1.25 USD
<input type="checkbox"/>	2 Nov 2017	Purchase from	Virtual World Services GmbH	Completed	-60.00 USD
<input type="checkbox"/>	2 Nov 2017	Purchase from	Virtual World Services GmbH	Completed	-10.00 USD
<input type="checkbox"/>	2 Nov 2017	Refund from	SENIORITY.CO.UK LIMITED	Completed	19.95 USD
<input type="checkbox"/>	1 Nov 2017	Payment to	SENIORITY.CO.UK LIMITED	Refunded	-19.95 USD
<input type="checkbox"/>	1 Nov 2017	Payment from	Reviewnet Gato	Completed	0.01 USD

Now I believe you see you can actually run your Business or whatever you do online and people can send you Payments to your PayPal account easily and Fast.

Ok let me now show you

How to create a PayPal account that sends and Receives Payment without VPN or IP related stuffs

You may be noticing me make mention of VPN or IP

Yes, there are guys who would setup paypal accounts for you only for you to discover that you will always need to change your country before you can log in to that account.

If mistakenly you forget to use a VPN service to change your location, then your PayPal account is at risk.

But In this eBook, you don't need all those.

You can login freely from Nigeria and do whatever you like with your account as long as it complies with PayPal terms.

So how do you Open this Account?

Step 1. Go to Paypal.com/ae

The AE after that slash is for Arab Emirates [Country]

Important: Make sure you add */ae* after the paypal.com (Paypal.com/ae)

The important thing is to create a Business PayPal account and not Personal account because personal accounts is used for making payments.

So when you Click on Signup you need to choose Business. That should be the Second Option.

Sign up for PayPal, it's free.

Choose from 2 types of accounts:

Personal Account
Shop in your country and around the world from your computer or on your mobile - all without sharing your financial info with the sellers.

Business Account
Accept payments and send invoices to your customers. It's easier and more secure to sell to anyone, anywhere, and any time.

[Continue](#)

Step 2:

You will be brought to a Page make sure you leave it the Country it shows you which is UAE. Click Continue and move on to the next step.

Step 4.

You will be taken to another page. There you need to enter in an email that you havent used before.

If you notice that when you put the email, you are directed to login, it means you have used that email before to create a paypal account and it cant be used again.

Create another email

Step 3:

Fill in details correctly

And use the Below details and instruction

- In Field for phone number don't change any country code there. Just Put in your mobile number but make sure you remove the first **0** put in the rest
- In Field for Address Line 1: Put in **Abu Hail**
- Leave Address Line 2 Empty
- City or Town: Put **Abu** there
- Postal Code: Put in: **18004**

Below is the Screenshot of how to fill it correctly according to above instructions

The screenshot shows a registration form with the following fields filled:

- Country code: +971 7083153274
- Address Line 1: Abu Hail
- Business address line 2 (optional): (empty)
- City or Town: Abu
- District/Region (optional): (empty)
- Postal Code: 18004

Now you should click on the Agreement Box and Hit Signup

Step 5.

This step should not be hard for you, just put in your business information. E.g. Prosper Industry, Advertising Category, Sub Category: Products etc..

Leave field for business URL empty, its not necessary.

Here, you need to Provide information About You;

Select the Identity Document you have. Select the one you know its still with you and enter the id number in the box then enter your date of birth and Submit.

Check screenshot below for guidance.

Provide information about Jake

Nationality

United Arab Emirates

National ID

982939SDDMKS1

13/10/1993

Home Address

Home address is the same as business address

Abu Hail, Abu, 18004

Submit

Now you will be welcome message thanking you for signing up at PayPal.

Almost Done, Just two things Left.

- Confirm Email
- Link a Card

Now you need to verify this account so it can be fully functional like other accounts.

From that Thank you page, click on Setup Payments, this will log you in to the PayPal account and you will see a red sign like below screenshot.

You see those red sign?

First you confirm the email you signed up with.
Login to your email and click the verification link.

When you click on it, you'd be asked to Login do so and you have confirmed the email successfully.

The Next is to Link and Confirm your Debit Card.

I always recommend

- FCMB Visa Card
- Access Bank Visa Card or Mastercard.

They won't disappoint you at all.

And another advantage when you Link a Visa Card is that you can send any payments in your PayPal account to your Visa Card.

That is to your Bank Account straight away.

So How to Link and Confirm Card.

After verifying the email, you will still see a red dot and this time it would show only one which means "It's asking you to link your debit card and confirm it"

But if you still see two red dots don't worry and no panicks, your email is verified with paypal already and would take some few minutes for that to disappear.

So this time you need to click on **“Link and Confirm Debit Card”**

Take Note:

- Make sure you have enough or little balance In your bank account because paypal will charge you **\$1.95** to confirm and after you confirm they return it back to your bank account.

Now on the next page, make sure you fill in your correct card details like below.

The screenshot shows the 'Link a card to get Verified' form on the PayPal website. The form includes the following fields and options:

- Link a card to get Verified** (Section Header)
- Start shopping online by adding and confirming your bank card.
- [Learn more](#) (Link)
- First name**: Jake
- Last name**: Dog
- Card type**: Visa (with icons for VISA, MasterCard, Discover, and American Express)
- Card number**: 181792373843984
- Expiry date**: 09 / 2034
- Security code**: (empty field, with a link [What's this?](#))
- Billing address**: Abu Hall, Abu, 18004, United Arab Emirates
- [Change](#) (Link)
- After you click Continue, we'll charge this card \$1.95 USD or equ within 24 hours after you confirm your card.
- Continue** (Button) and **Cancel** (Button)

Make sure you fill everything correctly.

One you click Continue.

PayPal will send a **PPcodeXXXX** To the Phone number you used to you're your Bank Account and the one used In receiving transaction alerts.

PayPal will debit your account and along with a code like *PP1234PP.

The 4 Digit number in the *PP**1232**PP is what you need to confirm the linking of your paypal account.

Now when you get it, log in to your paypal account and in the red dot again, click and put In the code and confirm.

Yesss! That's all to creating a PayPal account that can send and receive payments in your Country [Nigeria and Other Non Payment Receiving Countries]

So whenever you want to receive money to your PayPal account all you need is to give the person your PayPal email address ONLY.

Then they send it and it is credited to your PayPal account.

How do you withdraw your Money from PayPal to Bank Account?

This is what many people won't tell you but am going to reveal how to you.

There are two Options to withdraw your paypal account money to your Local Bank Account.

Method 1:

You withdraw to your Bank Account using your Visa Card. Only Visa Cards can withdraw, not Mastercard. So make sure if you wish to withdraw from the paypal you should link a visa Card.

But I will not advice you to go with this method

Why?

Because when you withdraw it to your Visa Card your bank will only charge very low.

For Example: If you are withdrawing to your Nigerian Bank account and Naira to Dollars is around 350 Per Dollar.

Nigerians Bank will only credit around N250 or N200 per Dollar. So low right?

That is why I recommend the Second Option.

Method 2:

This method is very straight forward.

You simply find exchangers online. That buys PayPal funds and they pay around N330 to N350 Per Dollar.

Example is naira2dollar.com, instantgoldng etc....

They simply send the money to your account and you send the PayPal funds to them.

Most Nigerian Bloggers or Internet Marketers, need this funds so you can connect with blogger friends and post it

“\$50 PayPal funds available for sale at N330/\$ and anyone interested would meet you In private message. They send you the money e.g. $N330 * 50 = N16,500$ to your bank account and you send them the money from your paypal to theirs.

That is it!

So Simple Right?

Using this Method, you can even help others create PayPal accounts and charge them too but please don't edit my eBook, you can resell it.
